

Kawartha North

Family Health Team

Kawartha North Family Health Team is committed to providing accessible, high-quality, team-based primary health care and wellness promotion.

Our Mission

To provide the best patient experience through accessible, high-quality, team-based primary health and wellness care.

Our Vision

To make a meaningful difference to the health and wellbeing of members in our community.

Our Values

Engagement - Patients are involved in their health care. Community support is critical to Kawartha North Family Health Teams's ability to provide that care.

Responsiveness - Kawartha North Family Health Team services respond to community needs. We maintain flexibility to respond to health sector trends.

Collaboration - We work together as a team and in partnership with other health care providers to provide high quality care for our patients.

Effectiveness - Kawartha North Family Health Team maintains a strong organizational foundation in order to provide high quality care with the resources available.

Quality - Quality care results from evidence-informed practice delivered through respectful, caring relationships.

The Kawartha North Family Health Team is committed to providing accessible, high quality team-based primary health care and wellness promotion. We focus on quality, safety and patient satisfaction.

Kawartha North Family Health Team offers:

- the right care
- by the right Provider
- at the right time

We are committed to advocating for fair and equitable access to health services, prevention, promotion and health education for our patients

Founded in 2006, the Kawartha North Family Health Team is composed of physicians, nurse practitioners, and registered nursing staff supported by highly dedicated clinic coordinators and an array of allied health professionals. As a community-led Family Health Team, our team is steered by a volunteer Board of Directors composed of local residents and is managed by a full-time executive director.

Our Services

At the Kawartha North Family Health Team, we provide primary health care services through our expert team of physicians, nurse practitioners, and support staff. However, our total health and wellness philosophy extends well beyond the “traditional” doctor’s visit to encompass...

- A focus on lifestyle and overall physical and emotional wellness
- A focus on hearing from all members of our community
- A focus on offering a range of services and programs to our primary care patients
- A focus on prevention and multidisciplinary care that integrates the services of other health providers and supports in our area
- A focus on one-on-one. Our patients are not just a health card number. They are people, and we want to walk with them on a lifetime journey of health and health care.

The kinds of services we provide include:

- Comprehensive primary health care services to our registered patients
- Community “walk-in” clinics open to all members of and visitors to our area.
- These services are offered at locations in Bobcaygeon and Fenelon Falls.

Preventative health programs and activities are geared to health prevention and overall wellness, ranging from walking and exercise programs to smoking cessation, blood pressure and med-checks, healthy diet, and more.

Phlebotomy (blood-work and lab) services are provided by the City of Kawartha Lakes Family Health Team as a joint-venture with the Kawartha North Family Health Team and available to patients of either family health team. These services are offered at our **100 East St. S. location in Bobcaygeon** and at the City of Kawartha Lakes Family Health Team’s **205 Francis St. E. location in Fenelon Falls**.

Mental health and addiction recovery services are provided by our on-staff counseling services to our patients for emotional and mental health. These are complemented by activities and programs offered to all members of the community as part of our preventative health approach. We also provide referral to community support services and specialized medical treatment.

Diabetes, cardiovascular, and other chronic disease management

Chronic ailments like diabetes, heart disease, vascular disease, and asthma impact our community - both young and old. We provide specialized one-on-one support and broader community-based programs and activities in complement with our primary care to help better manage these conditions and their complications proactively.

Our Team

For more detailed information for each Practitioner,
go to our Website at <https://knfht.ca/home/our-team/>

Walk-in Clinics

Your generous financial support helps us provide after-hours walk-in clinic care and other health supports to all members of our community not funded by the Ontario Government.

How can you make a donation? You can make a donation Online, by mail or in person.
To find out how simply click on this link <https://www.knfht.ca/donating/> for easy details.

Questions? Or, would like to discuss a special donation such as a memorial, bequeathal, or namesake contribution? Please contact our Executive Director, Marina Hodson, directly at Fenelon Falls phone number 705-887-3535 or by email at mhodson@knfht.ca
